

Dragons in Flight

The tune aims to tell the story of the three "Dancing Dragons" in flight: the A part of the tune, especially the down-and upward pattern in bars 1-2 and 5-6 simulates the beating of the dragons' wings, the shorter phrases indicating quicker wingbeats and the shift from minor to major key suggesting flight becoming easier as altitude is gained. The chromatic passages and longer phrases of the B part want to suggest our three dragons gliding along on their outstretched wings, dancing their dragon dance high in the sky.
